Background
Research Methodology

• In partnership with Ipsos MediaCT, we interviewed a total of 1,000 Chinese online adults (18-64 years of age) who identified themselves as using a smartphone to access the Internet

• The distribution is according to a national representative CATI Study

• A smartphone is defined as “a mobile phone offering advanced capabilities, often with PC-like functionality or ability to download apps”

• Respondents were asked a variety of questions around device usage, mobile search, video, social, web and commerce behavior and mobile advertising

• Interviews were conducted in Q1 2012
