Understanding the Mobile Consumer

May 2012

Ipsos OTX MediaCT
The Media, Content and Technology Research Specialists

Executive Summary

Smartphones have become an indispensable part of our daily lives. Smartphone penetration is at 60% of the population and these smartphone owners are becoming increasingly reliant on their devices. 66% access the Internet every day on their smartphone and most never leave home without it. **Implication:** Businesses that make mobile a central part of their strategy will benefit from the opportunity to engage the new constantly connected consumer.

Smartphones have transformed consumer behavior. Mobile search, video, app usage, and social networking are prolific. Smartphone users are multi-tasking their media with 86% using their phone while doing other things such as watching TV (34%). **Implication:** Extending advertising strategies to include mobile and developing integrated cross-media campaigns can more effectively reach today's consumers.

Smartphones help users navigate the world. Appearing on smartphones is critical for local businesses. 85% of smartphone users look for local information on their phone and 77% take action a result, such as making a purchase or contacting the business. **Implication:** Ensuring that clickable phone numbers appear in local results and leveraging location based services on mobile make it easy for consumers to connect directly with businesses.

Smartphones have changed the way consumers shop. Smartphones are critical shopping tools with 76% having researched a product or service on their device. Smartphone research influences buyer decisions and purchases across channels. 25% of smartphone users have made a purchase on their phone. **Implication:** Having a mobile optimized site is critical and a cross-channel strategy is needed to engage consumers across the multiple paths to purchase.

Smartphones help advertisers connect with consumers. Mobile ads are noticed by 93% of smartphone users. Smartphones are also a critical component of traditional advertising as 70% have performed a search on their smartphone after seeing an offline ad. **Implication:** Making mobile ads a part of an integrated marketing strategy can drive greater consumer engagement.

Where Mobile Ads Are Noticed

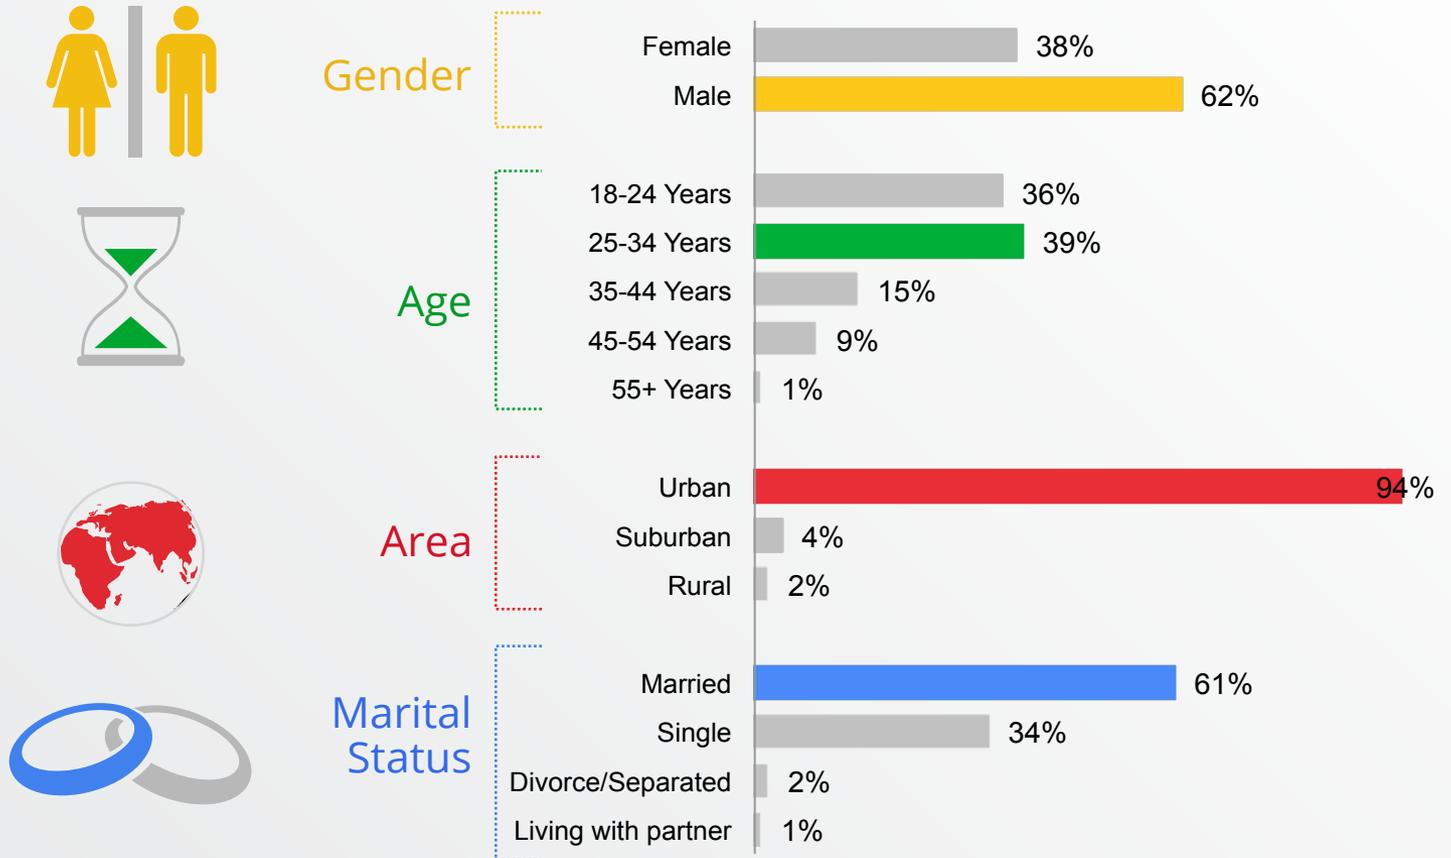

Background

Research Methodology

- In partnership with Ipsos MediaCT, we interviewed a total of 500 Saudi Arabian online adults (18-64 years of age) who identified themselves as using a smartphone to access the Internet
- The distribution is according to a national representative CATI Study
- A smartphone is defined as “a mobile phone offering advanced capabilities, often with PC-like functionality or ability to download apps”
- Respondents were asked a variety of questions around device usage, mobile search, video, social, web and commerce behavior and mobile advertising
- Interviews were conducted in Q1 2012

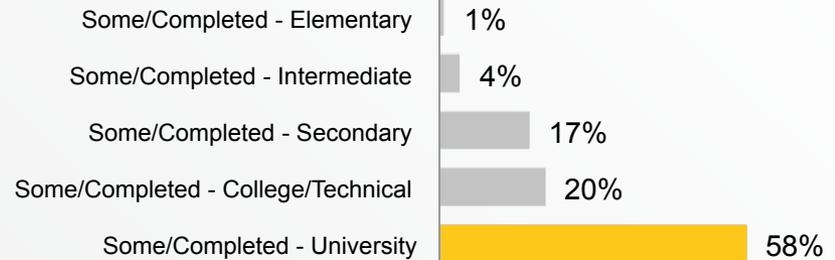

Demographics

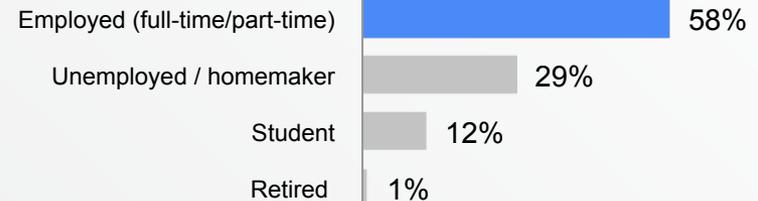

Demographics

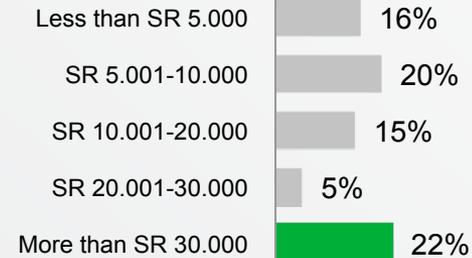

Education

Employment Status

Income

Base: Private smartphone users who use the Internet in general n= 500

D4. What is the highest level of education you have completed? D5. Which of the following best describes your employment status? D8. Which of these ranges comes closest to the total (annual) income of your household before anything is deducted for tax National Insurance (Social security) pension schemes etc.?
