FOURSQUARE

Location layer of the internet

We've been powering the places in your pocket for years.

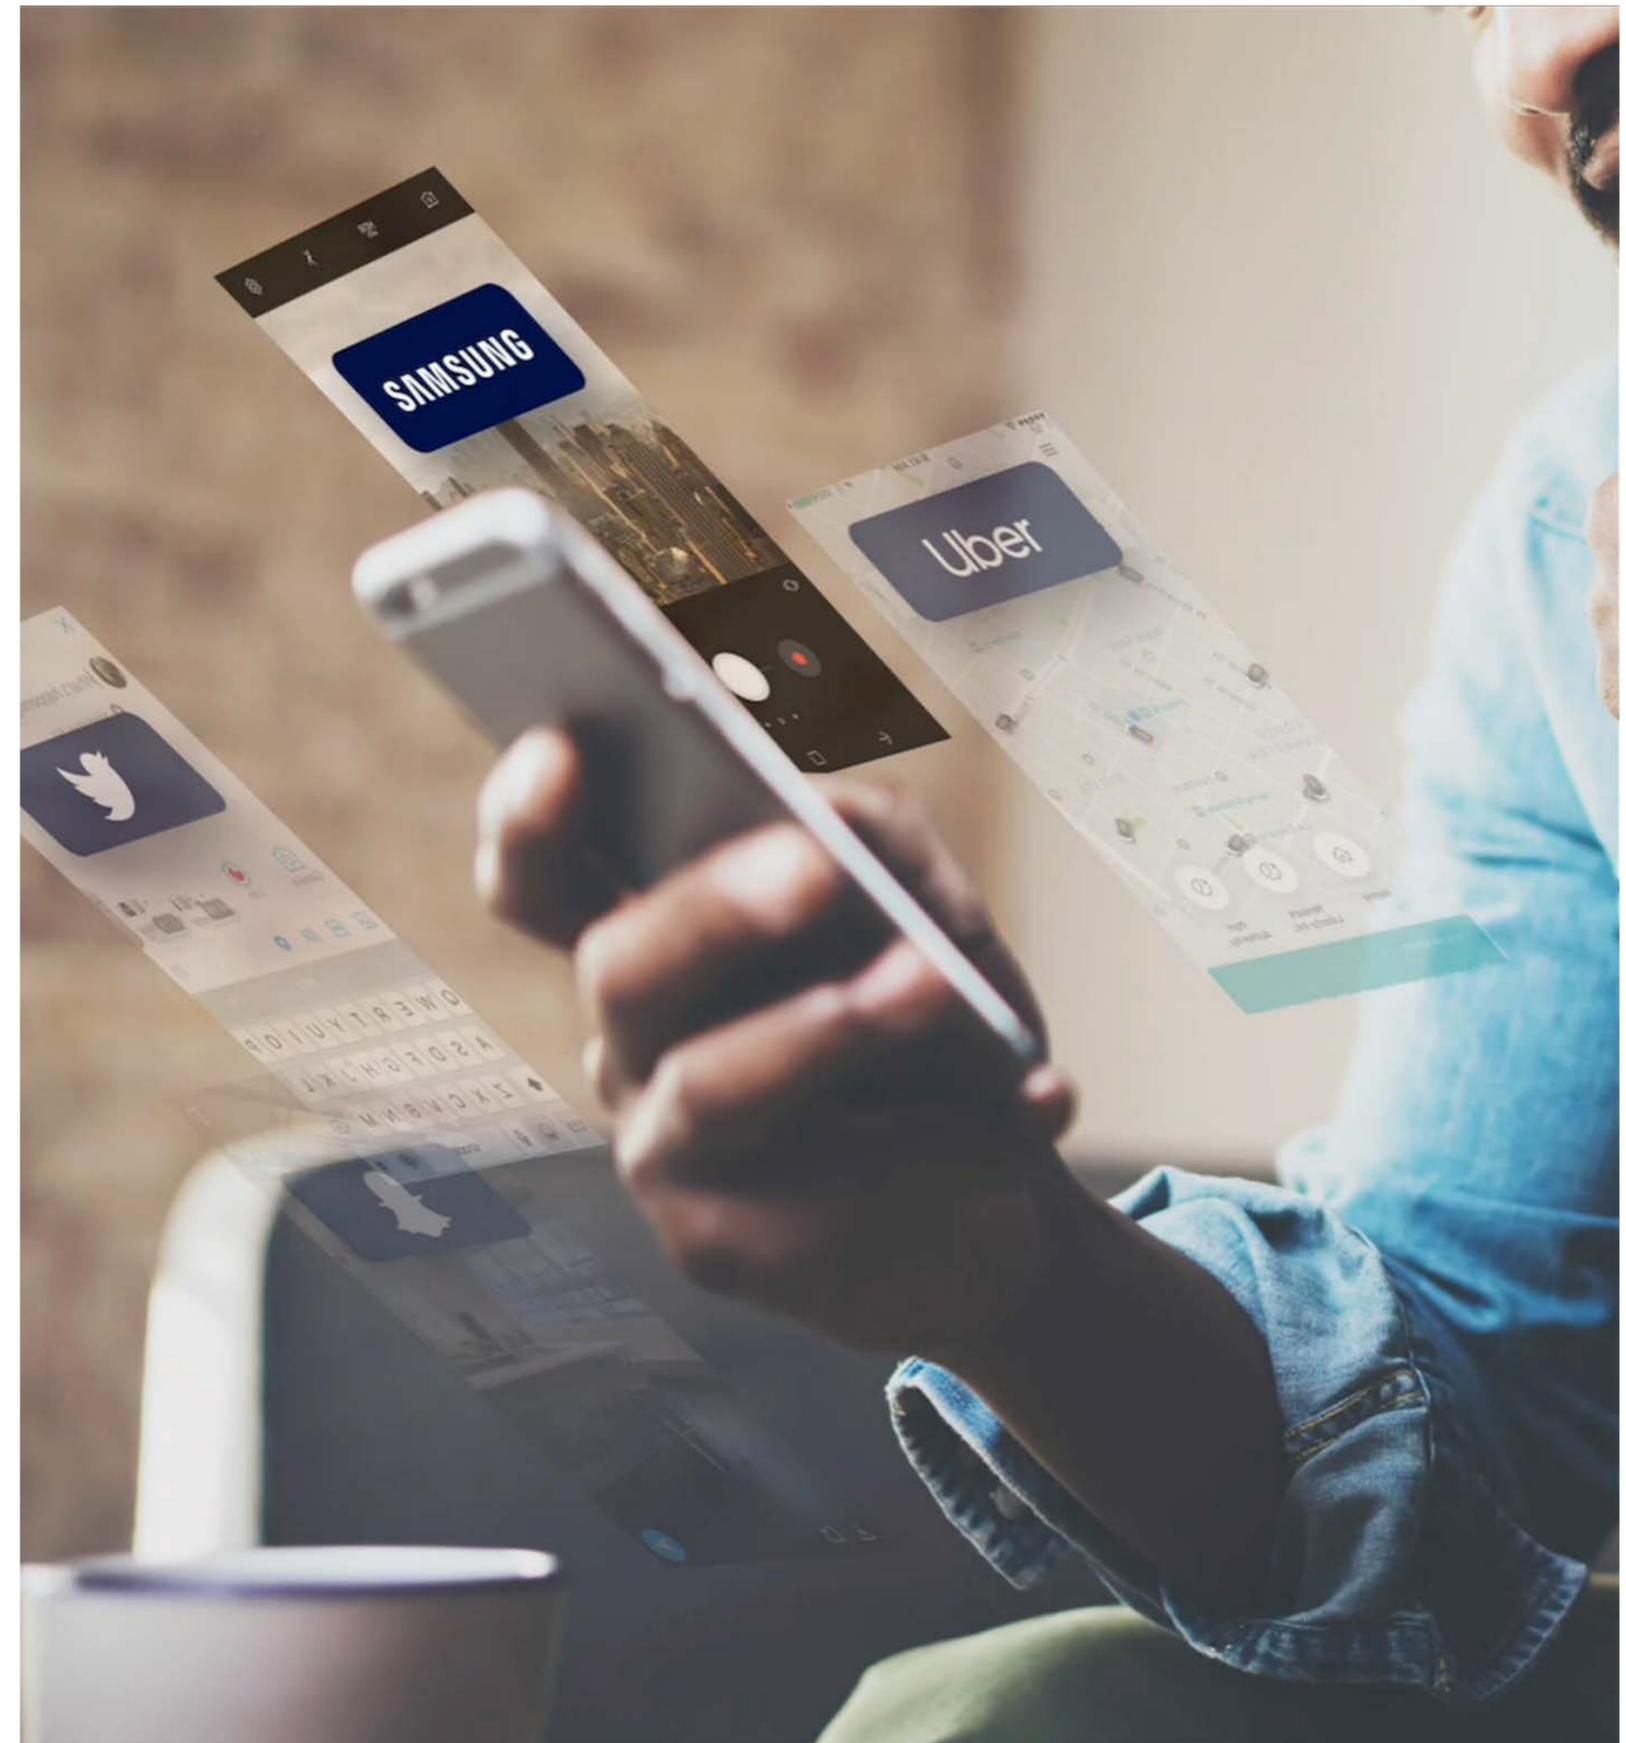

Ever typed a venue in Uber?

Add a geofilter to Snapchat?

Geotag a tweet in Twitter?

Snap a photo with a Samsung phone?

That's Foursquare.

Foursquare creates technology that builds meaningful bridges between digital spaces and physical places.

People Data

Going beyond GPS to ingest a broad array of sensor data: ~10M first and ~500M third-party devices

FOURSQUARE /pɪlgrɪm

The engine that combines a 'phone's eye view' with a unique place thumbprint, trained by more than 14B times someone has told us 'I am here'.

Places Data

A proprietary map of ~100M places, validated by millions of users, and rich in attributes

FOURSQUARE

The global pharmaceutical company developed an innovative targeting strategy and partnered with Foursquare for precise targeting and measurement based on real-world data.

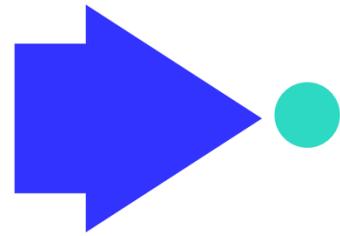

Brands today only understand half of their customer. Location data provides the whole picture

How Allergan leverages location

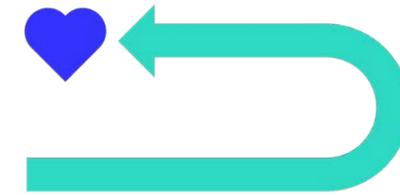

Reach your target audience based on real-world behavior

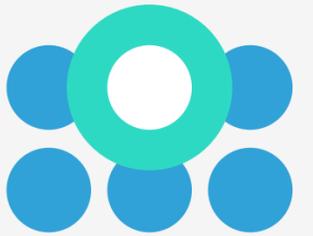

Target consumers at point-of-interest in real time

Win back customers by engaging lapsed customers

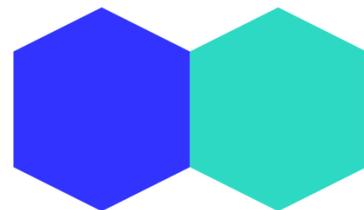

Conquest the competition by reaching those currently shopping

Grow loyalty by engaging those who visit your store

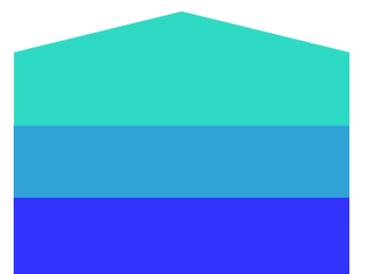

Prove marketing efficacy by marrying digital advertising with real-world behaviour

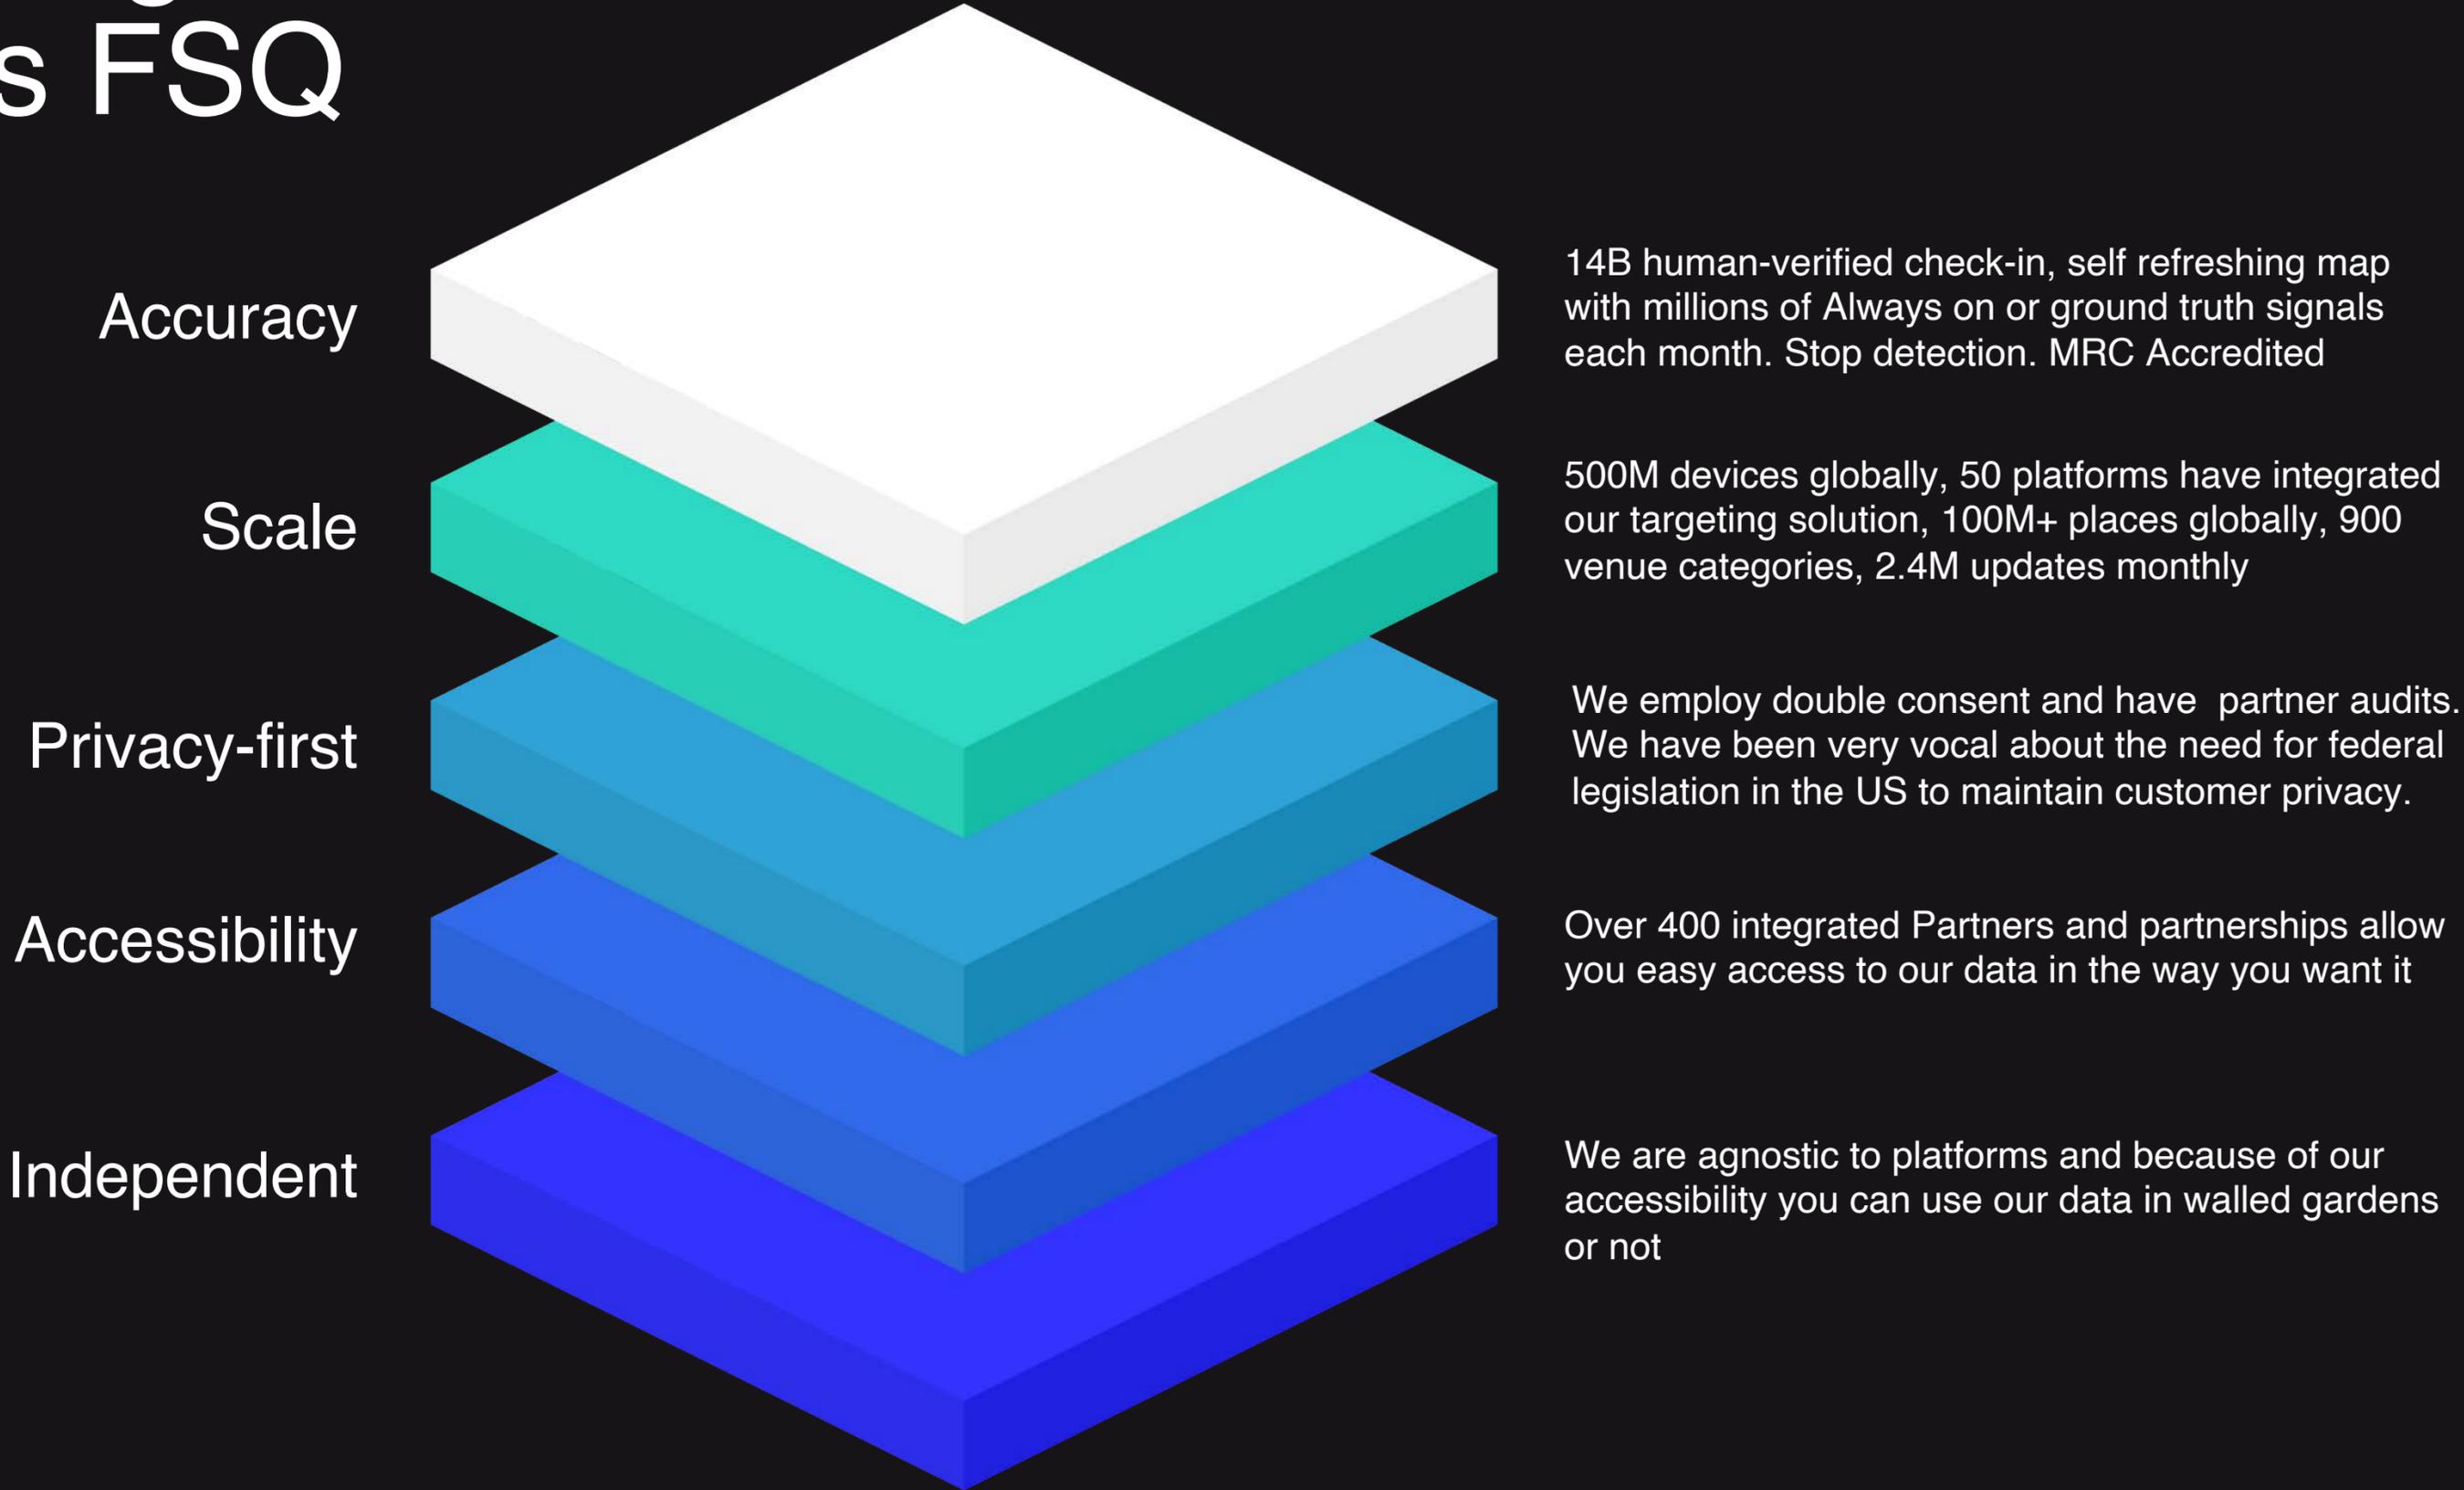

Break down wall gardens with easily accessible data

Build advance audience for customer acquisition with visitation patterns

Why Allergan chooses FSQ

The future of location is privacy-centric

Allergan + FSQ/Pilgrim

(Customer 1P lat/lng coordinates mapped to precise POI visits, with or without additional 3P data enrichment to supplement scale)

Custom off or online visit processing at scale for proprietary raw location data; available across app properties and mobile web. Integrated with preferred environments:

We keep data within Allergan's preferred walls, yet simultaneously optimize for value extraction

Targeting & Personalization

Deep understanding of customer attributes based on where they live, work and transact to better personalization inventory placement

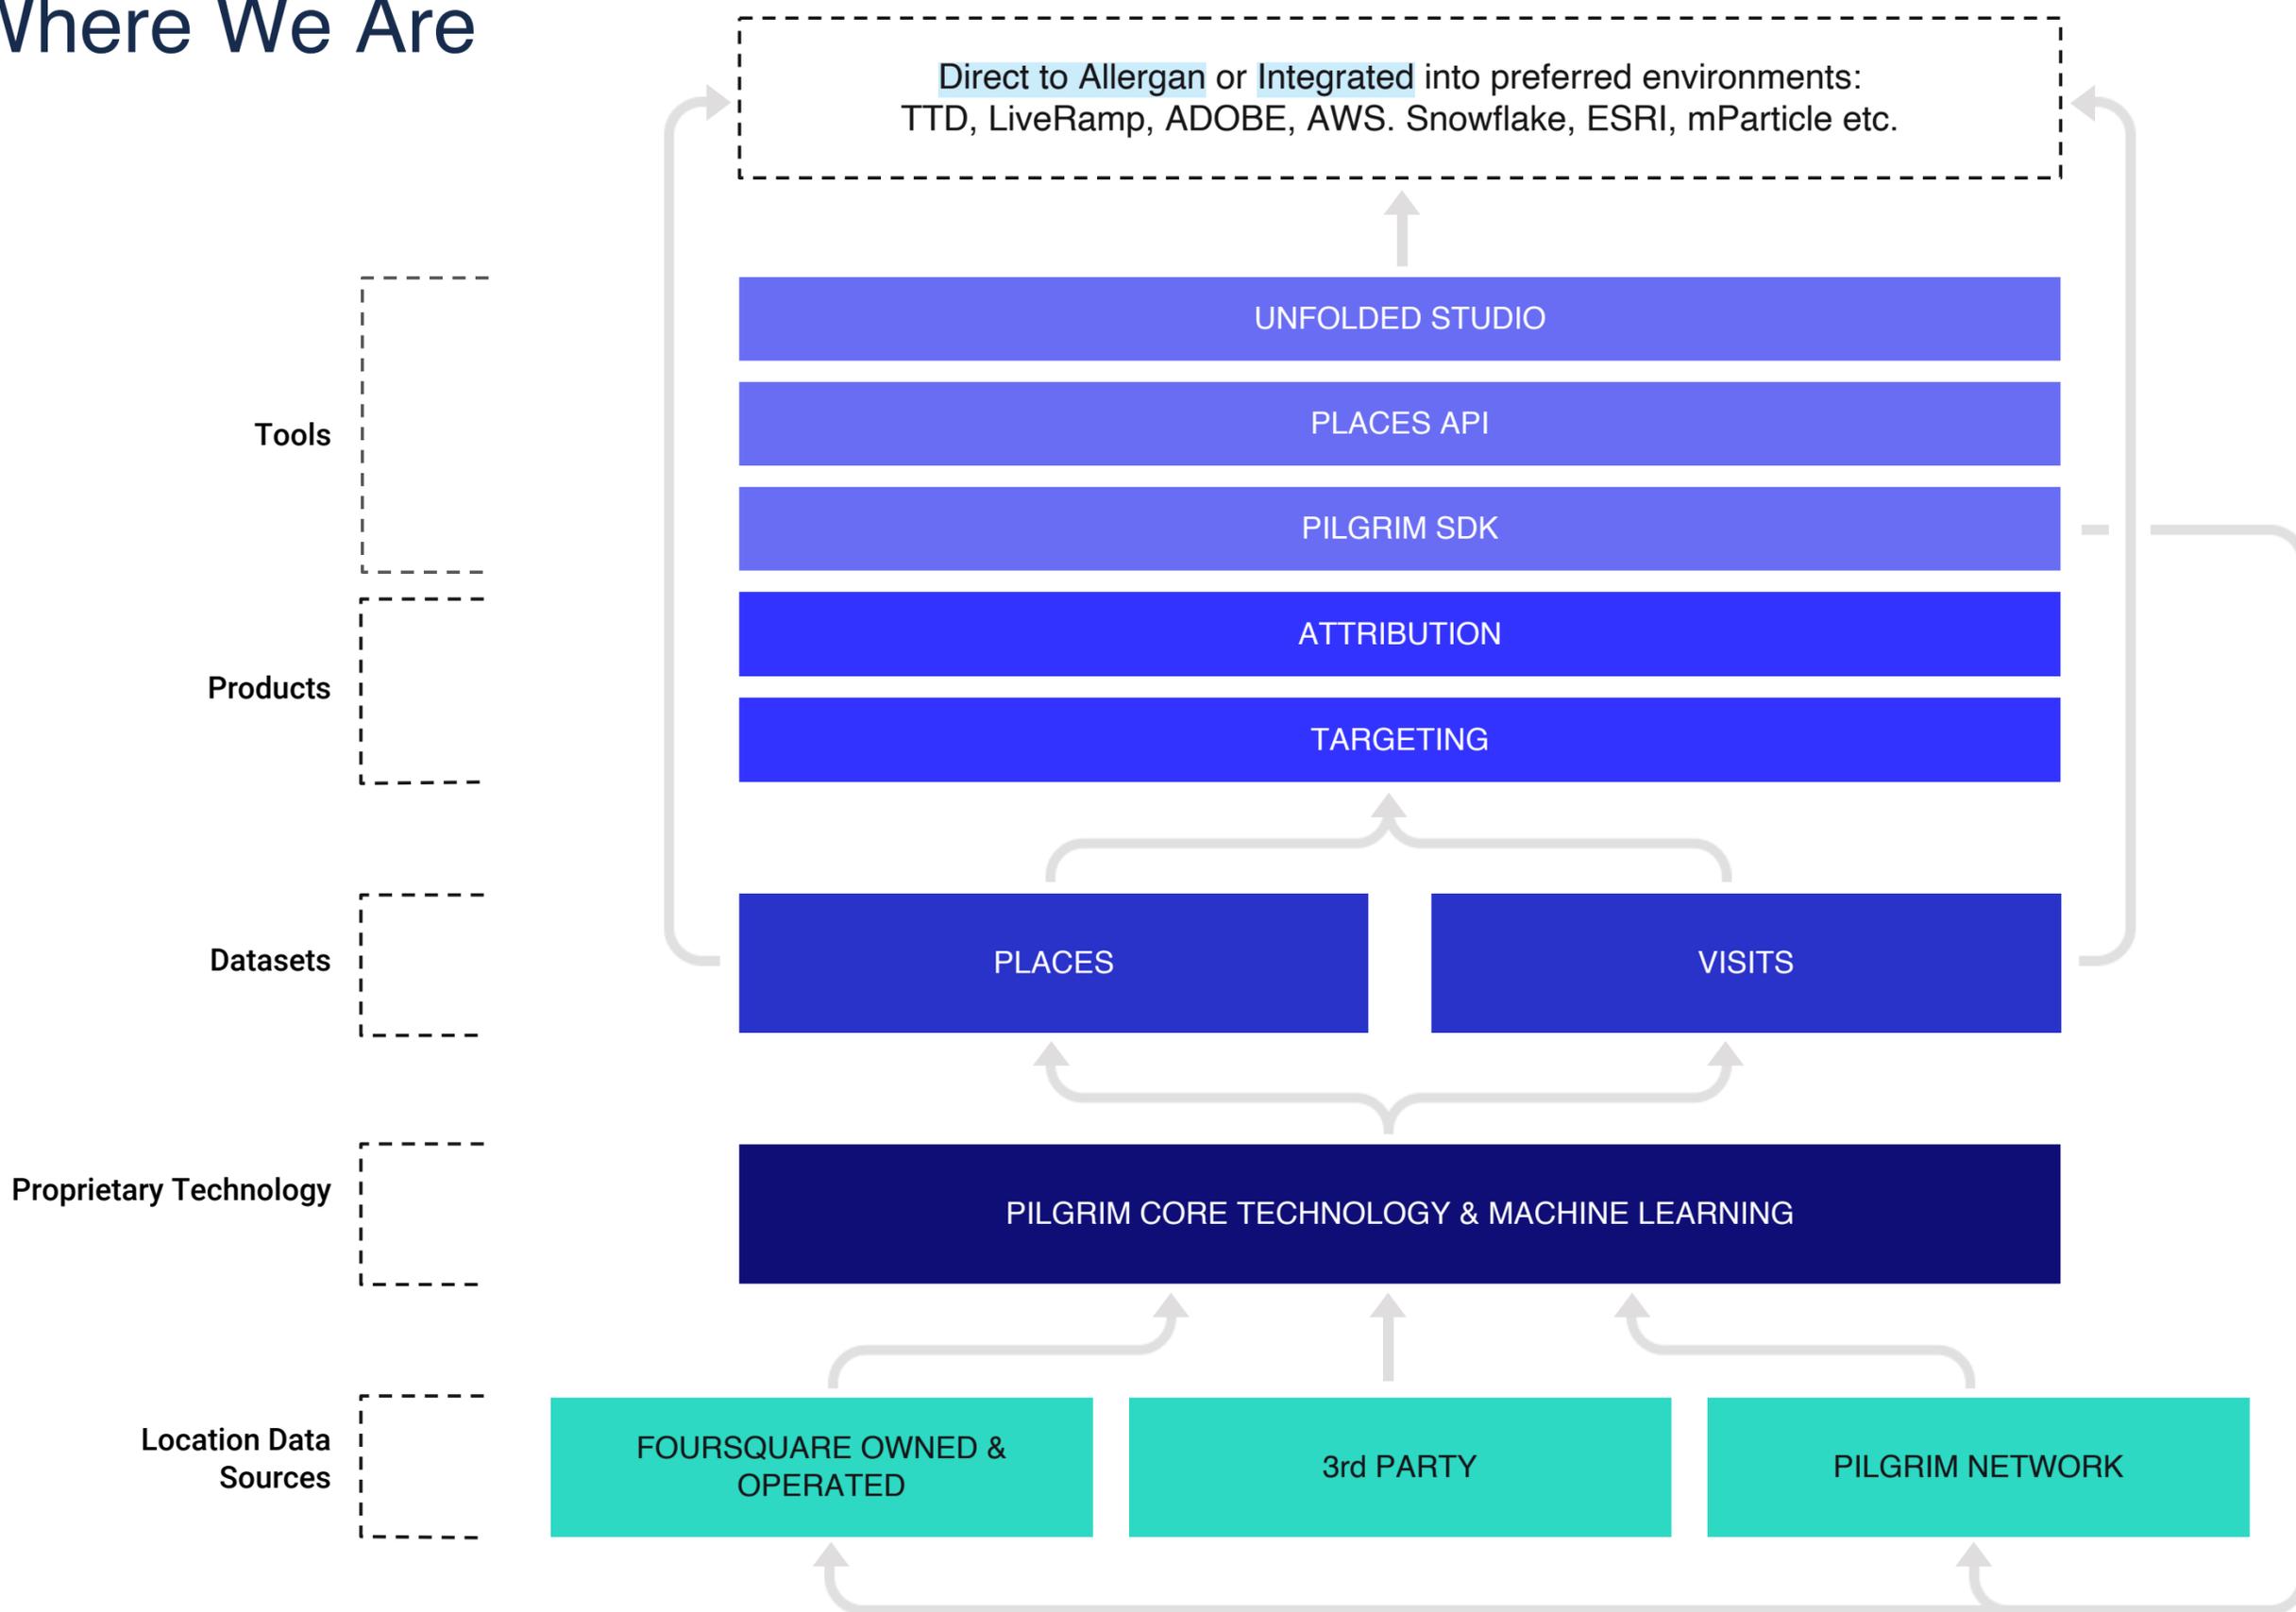

Attribution & Footfall Measurement

Precise reporting on in-person conversion of advertisements across—100M global POIs with deep chain and category filtering

Customer Analytics

KYC beyond digital boundaries, leveraging—9B monthly real world visits to give analyses of patterns & traits greater sophistication

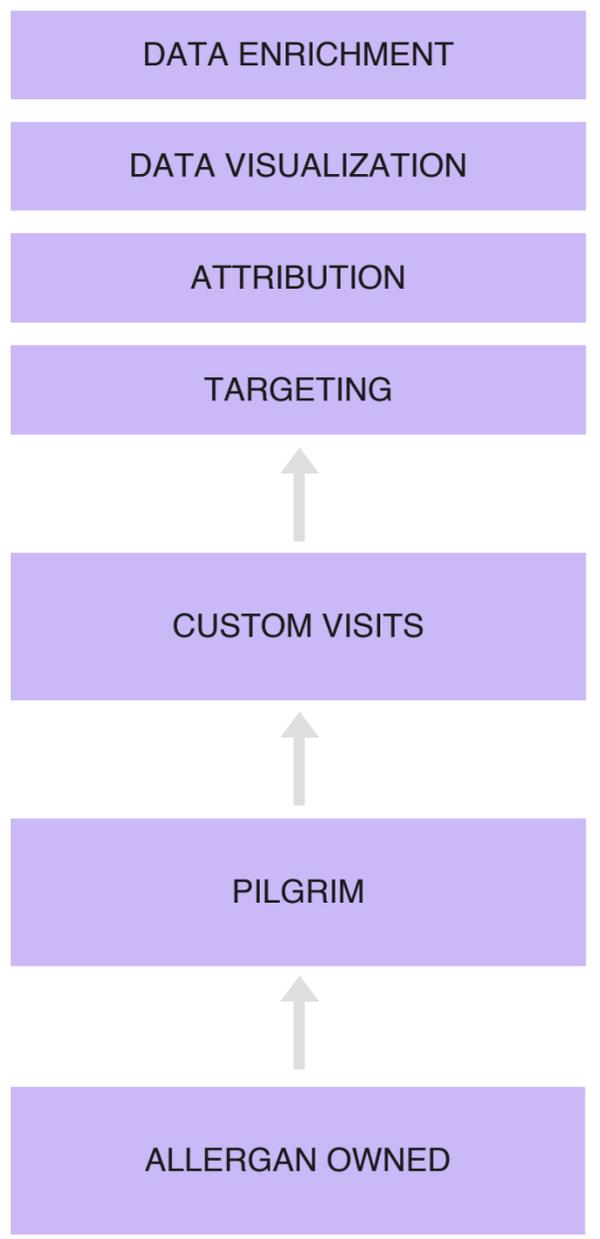

Where We Are

FSQ

Where We're Going

Brand specific location data and tools integrated into Brand's tech stack

Confidential © Foursquare 2020

Enable access to the most powerful, robust and precise real-time location technology and data for our customers

Thank you
