DATT UNPLUGGED | VIRTUAL

DATA IN MARKETING THINK TANK
OCTOBER 13, 2021

Helping brand marketers apply data with greater confidence.

COMING OCTOBER 13, 2021
MMA DATT UNPLUGGED VIRTUAL
DATA IN MARKETING THINK TANK

[#ShapeTheFuture®](#)

OVERVIEW:

In the age of 1st party, 2nd party and 3rd party, complexity proliferates in how marketers can use data to build deeper consumer relationships and as a strategic operating tool. To successfully navigate this data landscape, marketers must have a strategy in place that relies on clarity, transparency and compliance, while still providing a value exchange for the consumer.

Future Proofing Customer Centric Marketing in the New Identity Landscape

With the ongoing shifts in the “Identity landscape”, marketers are facing significant uncertainty as they prepare for a new digital marketing ecosystem without third-party cookies, and with dozens of new potential ‘identity’ solution replacements. This session will provide perspective on how marketers can effectively navigate these shifts, covering a recap of the Future of Identity debates MMA and BCG have led on this topic over the past several months, with a discussion around the top 3 questions marketers are continuing to ask:
what should I expect the impact of these changes to be for my business, how should I evaluate new ‘identity’ alternatives in the market and what are the 5 actions I can take NOW as a marketer to prepare for the changes still to come.

BIGtoken

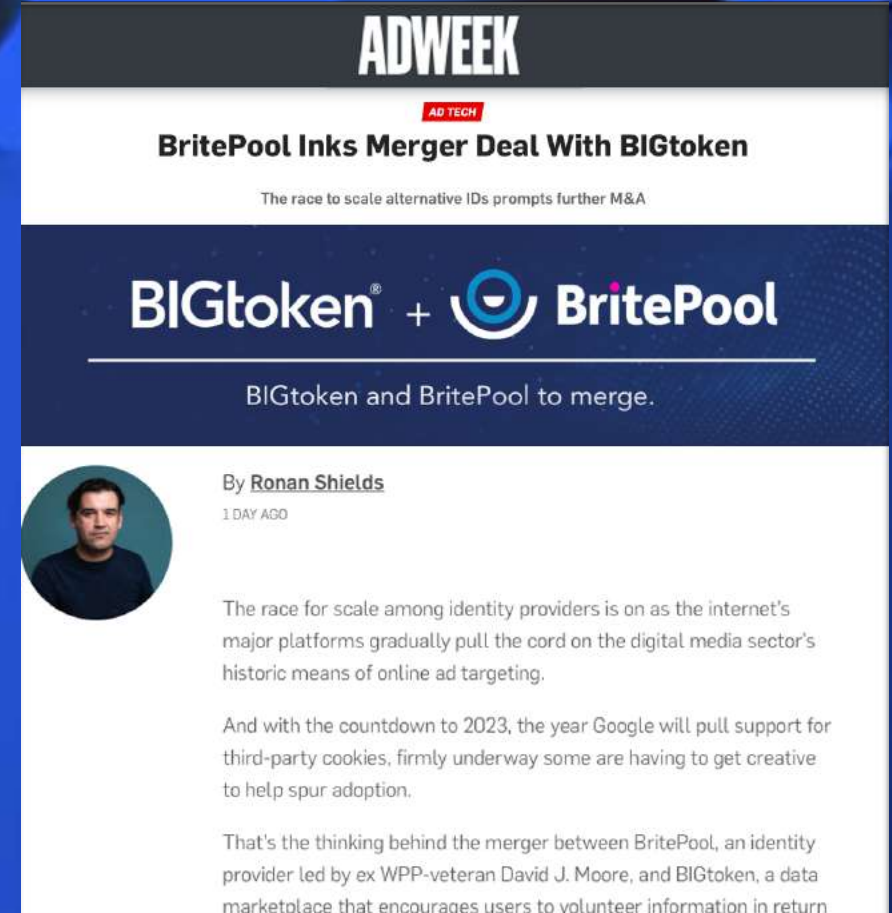

BritePool & BIGtoken

Merger announced Sept. 29th, completion subject to necessary approvals.

Shared, motivating beliefs:

- Industry at a seminal time.
- Today's rapidly evolving marketing environment increasingly demands consumer consent and anonymity.
- Marketers will succeed with new tools based on fundamental changes.

BritePool is merging with BIGtoken to address these unfulfilled requirements.

The screenshot shows a news article from Adweek. At the top, the Adweek logo is displayed in white on a dark blue background. Below it, a red 'AD TECH' tag is visible. The main headline reads 'BritePool Inks Merger Deal With BIGtoken' in bold black text. A sub-headline below the headline states 'The race to scale alternative IDs prompts further M&A'. The article features a large graphic with the BIGtoken logo (a blue circle with a white 'B') and the BritePool logo (a blue circle with a white 'B') separated by a plus sign. Below the graphic, the text reads 'BIGtoken and BritePool to merge.' The author's name, 'By Ronan Shields', is listed, along with a circular profile picture of the author and the text '1 DAY AGO'. The main body of the article begins with the text: 'The race for scale among identity providers is on as the internet's major platforms gradually pull the cord on the digital media sector's historic means of online ad targeting. And with the countdown to 2023, the year Google will pull support for third-party cookies, firmly underway some are having to get creative to help spur adoption. That's the thinking behind the merger between BritePool, an identity provider led by ex WPP-veteran David J. Moore, and BIGtoken, a data marketplace that encourages users to volunteer information in return'.

The Future Belongs to Firms Which Recognize the Time for Business as Usual is Past

Disappearing cookies are one step, in an accelerating, privacy-focused, seismic transformation.

Many identifier solutions are *insufficient* for the emerging era

- Reflect pivots to accommodate the loss of the cookies.
- Without the necessary, reimagining of the consumer/marketer relationship.

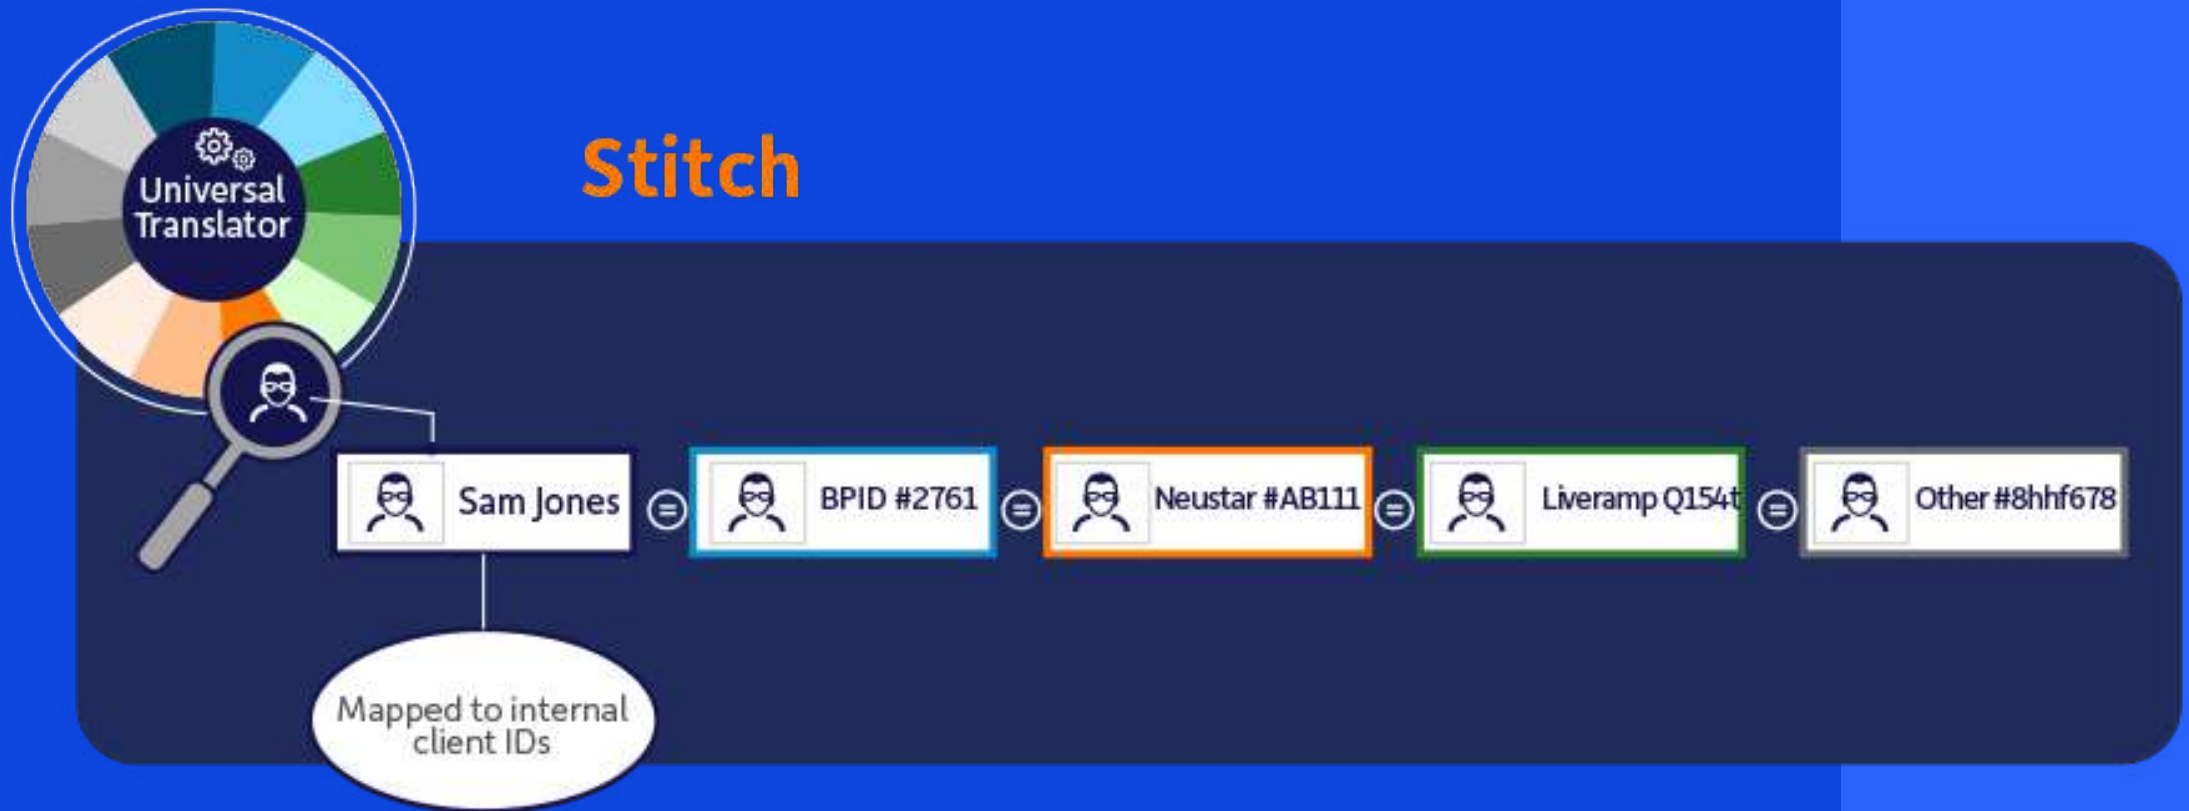

High-Value Consumer Data at Scale

As a combined entity BritePool and BIGtoken will solve the central problems of identity marketing

- *In the near term*, interoperability to realize scale in first-party data, to enable marketers to realize the promise of accurate targeting.
- *A fundamental transition* to provide zero-party data, and related customer insights, at scale for customer acquisition and customer retention.

Stitch: Interoperability with Multiple IDs mapped to a single identity

The Only solution: to 35+ US-based* ID projects

- Google's continued insistence that it will quickly depreciate third party cookies led many companies to create proprietary identification tools for the "post cookie world."
- This means that a single consumer will have multiple IDs from different companies...
- In sum, the emerging ecosystem, recreates many of the problems associated with targeting cookies (excess frequency, over-estimates of reach and poor optimization).

*Source: Digiday, March 11, 2021 (<https://digiday.com/media/advertisers-start-long-overdue-reappraisal-of-post-cookie-identifiers/>)

Our conclusion: To reach scale, advertisers require multiple ID's that must be linked

Advertisers now achieve maximum reach by targeting and transacting against several identity solutions.

In this balkanized ecosystem, advertisers are unable to realize the full benefits of identity marketing

- Campaigns targeting each identity solution are managed independently.
- DSPs lack the ability to “look across” campaigns to prevent excess frequency and maximize reach.
- Hence, DSPs can't optimizing campaigns.

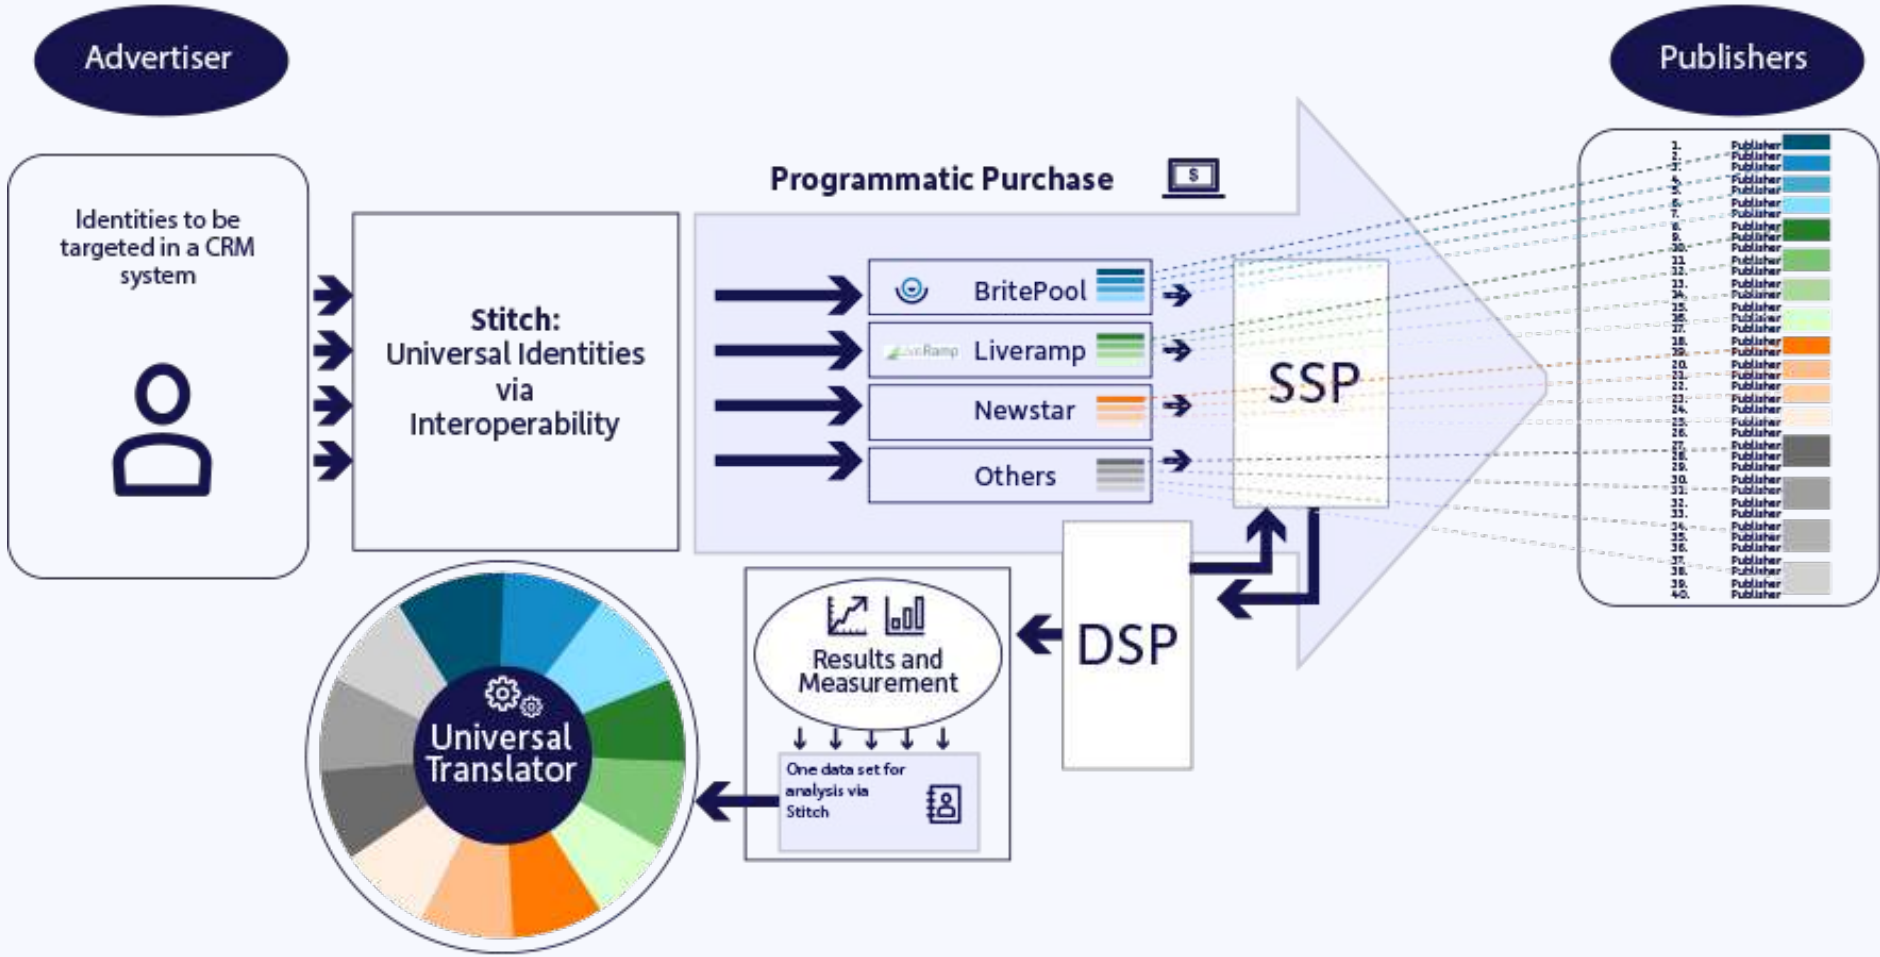

In addition, different identity solutions may follow different ethical standards for authentication.

BritePool integrations across the adtech ecosystem are the foundation for Stitch.

Stitch: A universal, ethically authenticated, interoperable identity for effective advertising

BIGtoken

Empowering consumers to own, control and earn from their data.

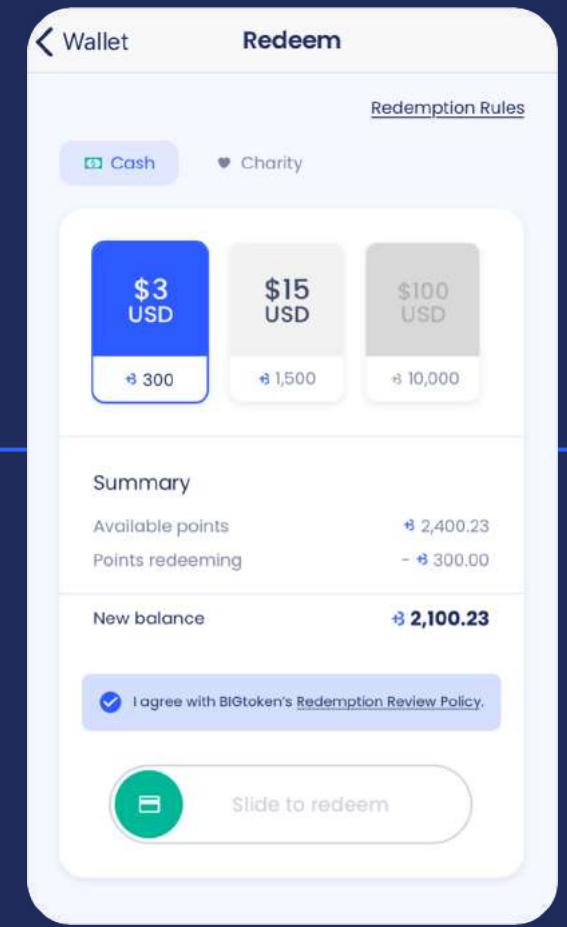

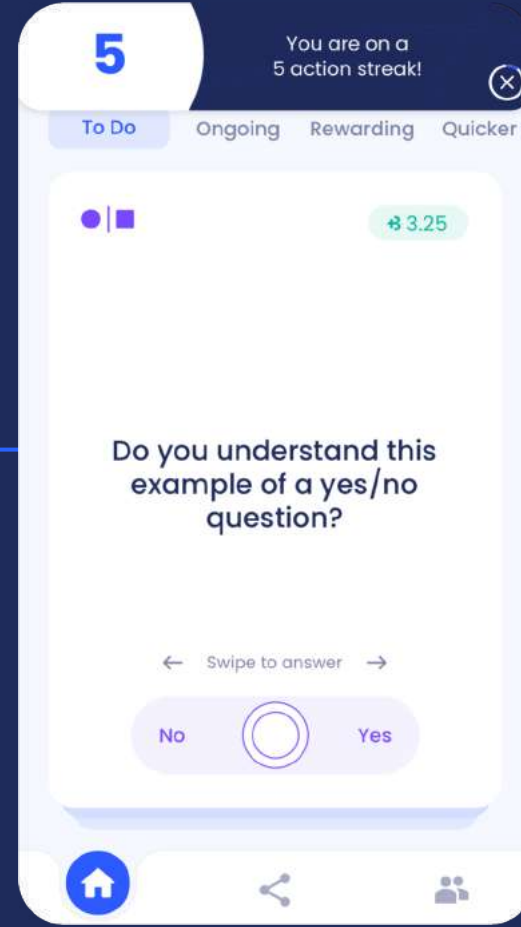

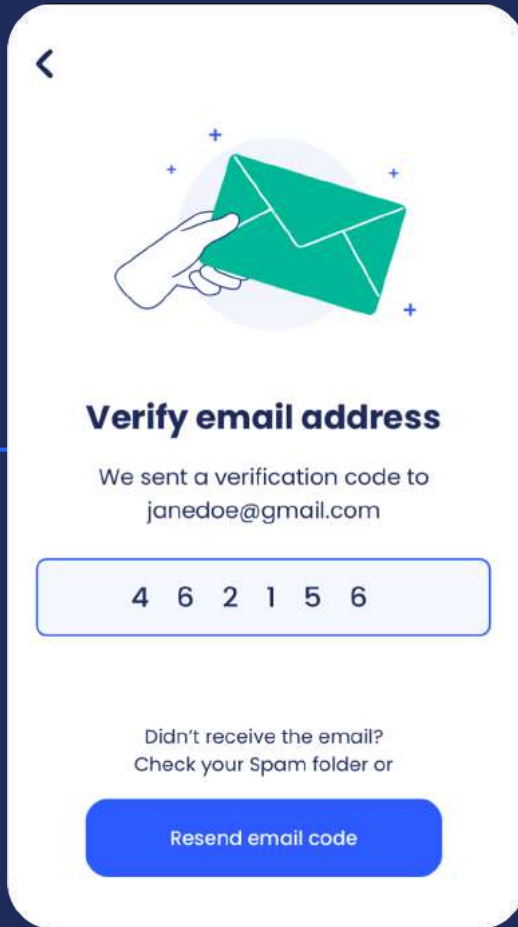

This consent-first approach allows advertisers to create the accurate, zero-party consumer data they need

- To drive marketing decisions.
- Reach new customers.
- Activate former customers by treating them like partners.

The BIGtoken platform does exactly this:

Consented, Rewarded ID Creation

Ethically sourced Identity, Consumer Insights Platform

Audience, Activation, & Measurement

1. Strategy

Engage directly with consumers: just in time data, content creation, messaging, and new products

2. Audience Creation

Custom data sets and incremental profiles for laser accurate personalization

3. Activation

AI driven data science creates scale for personalized messaging & meaningful connection

4. Optimization

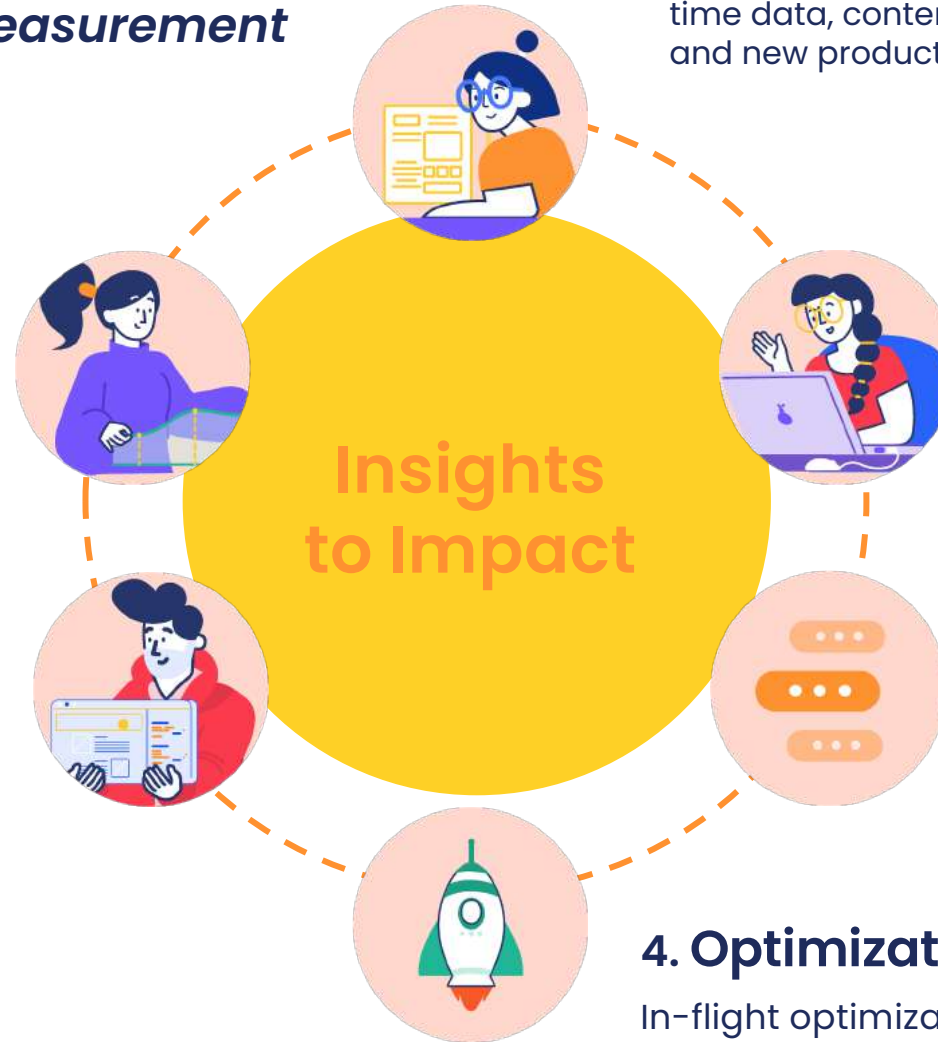

In-flight optimization

6. Insights Analysis

Create ongoing data and Inform future campaigns

5. Measurement

Purchase intent & awareness impact

BIGtoken®

Hyper-relevant Insights, Real-time Intelligence & Actionable Data

Create case specific actions and in-feed surveys to create **just in time** data and insights

Match that to thousands of ethically collected attributes

- Cross-verified & Authenticated
- Single View, 360° holistic consumer profiling
- Declarative, deterministic, and passive data
- 99% verified accuracy

Step 1: On-demand Audiences with Survey Science

BIGtoken surveys create insights and actionable data.

Customized to a campaign's time period and objectives, BIGtoken surveys identify and define the most valuable segments of audiences to target.

Real time intelligence
Timely & fresh consumer behaviors, that reflect shifting & current behaviors.

Hyper-relevant engagements
Robust insights, deep understanding of consumer sentiments, purchase influencers, & motivations.

Consented, Seed Data Creation
